

Dear friend,

Before KAT's existence those people who did care and noticed sick or injured stray animals or abandoned puppies had no choice other than turn they head, as there was no system of public veterinary assistance for such emergencies. Today our rescue service is well known by the community. Every day local people contact us or bring several animals to KAT Centre for treatment. Our animal ambulance is a normal sight running the streets of Kathmandu. Nowadays many more puppies have a better chance to survive and to be adopted through KAT's social networks. Until now KAT Centre has improved the life of thousands of street dogs and worked tirelessly to help animals in need. After the earthquake and the recent blockade from India, here in Kathmandu our work is more important than ever, but we are now facing a critical situation that we cannot overcome without your help. We need your financial support and ask you also to take our message, through emails, personal contacts, facebook and other social media, to others who would help us if only they knew what we do.

Although KAT has always managed to cover its day-to-day running costs, it is now facing a major challenge: as without warning, the lease on its centre has been revoked, catastrophically leaving us with only a short time to find a new location. This is a common occurrence in Nepal, which recently slowed down our activities for months. Consequently we realize the necessity to buy a permanent site, not subject to the whims of landlords and property developers. This will ultimately enable KAT to help animals more effectively. We have already found and negotiated a new site but we need to raise the required funds before September 2016 to make the final payment on the property and build the infrastructures.

We do not receive governmental funds neither we have professional fundraisers, but we rely on the support of kind donors like you. We are already more than half way towards our objective and together this can be accomplished. We need you and others like you to spread the word. If you have already supported KAT, so you are convinced of the worth of what we do, **please convince others: your personal influence will be more effective than anything we can say in our modest fundraising efforts.** If you have given us US\$10, you can almost certainly find ten people who will together give us US\$100 or even more.

With your support we will be able to continue with our work and steadily expand our vaccination and Animal Birth Control Programmes, so as to reduce the suffering of street dogs and cut down the threat of rabies to the people of Kathmandu.

Please help KAT and spread the word, **ANY contribution big or small will matter.**
